### DyStar Letter of Confirmation – EAEU / Russian Inventory

Dear valued customer,

the Eurasian Economic Union (EAEU), consisting of Russia, Belarus, Kazakhstan, Armenia and Kyrgyzstan, has passed a new chemicals law in 2016 (TR 041/2017). This so-called “Eurasia REACH” is mainly based on former Russian chemicals regulations and shows similarities to EU REACH. The regulation is not fully in place yet. However, Russia has started to install a chemicals inventory with an extended deadline for submitting notifications to the inventory which expired on August 1, 2020. The Russian inventory is not yet finalised, but the interim results of a unified list of chemicals are available online (<https://gisp.gov.ru/cheminv/pub/app/search/>).

We hereby confirm that DyStar successfully notified and pre-registered all relevant substances of all DyStar products available in the EAEU and the EU according to TR 041/2017, for inclusion into the future inventory of chemicals in the Russian Federation and EAEU.

With best regards,

DyStar Colours Distribution GmbH
