

DyStar Environmental Policy

As a world-leading textile dyestuff supplier, protecting the environment is our major priority, with our dyes, chemicals, and services. We recognize environmental protection as one of our guiding principles and a key component of sound business performance.

In this Environmental Policy, we are committed to:

- Comply with all local environmental legal requirements,
- Meeting the demands and expectations of the relevant interested parties by considering internal and external issues,
- Produce and develop products in compliance with all national and international standards,
- Use sustainable resources within the scope of our environmental management system,
- Ensure minimum aspects generation in all our activities,
- Set attainable and measurable targets to prevent global warming, prevent environmental pollution and protect the Ecosystem,
- Aim to improve our environmental performance, implement environmentally friendly practices, and ensure continuous improvement with our environmental objectives,
- Evaluate opportunities and risks by managing environmental aspects in our processes, workplaces, and surrounding areas,
- Promote environmental awareness among our employees and stakeholders with relevant training programs,
- Take the opinions of our employees and stakeholders in our environmental activities,
- Communicate our environmental policy to our customers, brands, retailers, consumers, employees, stakeholders, and the public to encourage them to support it,
- Produce products that meet environmentally friendly production processes in all sectors we operate.
